

SCIENCE

Grants, awards and the premier peer-reviewed journal to facilitate cutting-edge obesity research

CLINICAL CARE

Guidelines, standards and practical tools to promote effective, evidence-based obesity care

PUBLIC HEALTH

Research, policy development and advocacy to improve the lives of people with obesity

EDUCATION

Courses, competency standards and ObesityWeekSM, the largest annual meeting of obesity professionals

COMMUNITY

A vibrant, collegial network of obesity-focused clinicians, scientists and policymakers

THE OBESITY SOCIETY – Creative Science Driving Effective Care

OUR VISION– Solving the challenges of obesity through deeper understanding and coordinated action

OUR MISSION– To promote innovative research, effective and accessible care, and public health initiatives that will reduce the personal and societal burden of obesity

OUR VALUES– Rigorous science, highest professional standards, and strength through diversity

THE OBESITY SOCIETY

Leading the Way to Practical Solutions

SCIENCE TRANSLATION COORDINATION AND COLLABORATION

RESEARCH

Supporting creative basic, clinical, health services and collaborative research through funding, education, advocacy, mentorship and publication

CLINICAL PRACTICE

Supporting clinicians through specialized training, education, evidence-based clinical guidelines, and dissemination of best practices

PUBLIC HEALTH

Advocating for innovative solutions and their rigorous evaluation, elimination of obesity-related stigma, equitable access to care, and greater investment in research, prevention and treatment

SPECIALIZED EXPERTISE

Serving professionals and the public through rigorous assessment and vigorous debate of scientific findings, innovative clinical strategies and policy recommendations

PROFESSIONAL DEVELOPMENT

Fostering professional success through skills and leadership development, mentorship, publication and networking opportunities

DIVERSITY

Advancing our work by harnessing the diversity of our members, our patients, our professional activities, and obesity itself

COMMUNITY

Supporting scientific and clinical progress by promoting education, communication and collaboration across professional disciplines and individual perspectives

LEADERSHIP

Promoting deeper understanding of the causes, effects and societal impact of obesity and recruiting partners with diverse expertise and resources to help combat this global problem

PROGRESS THROUGH COLLABORATION

Through our collaborations with global partners in academia, government, industry, and community action, we are in a unique position to promote greater understanding of obesity and more effective policies, public health initiatives and treatment strategies. Together, we aim to influence the discussion about obesity and the actions needed to effectively combat this devastating disease.
